

ANTI SLIP PANELS

Providing **safety** underfoot

THE QUICK AND EASY SOLUTION TO THE DANGER OF SLIPPERY SURFACES

Anti slip panels are one of the simplest, most cost effective ways of providing an anti slip surface in nearly any situation. From decking, ramps and wooden stairs, to anywhere there is a danger of slipping. The panels are easy to cut, and can be glued or drilled into place with very little mess.

And the best part?

They are manufactured from recycled plastics, so not only are they light on your pocket, but easy on the environment too.
